Ms. Melissa Whittington (3HW41)
Remedial Project Manager
U.S. EPA Region III
841 Chestnut Building
Philadelphia, Pennsylvania 19107

Dear Ms. Whittington:

As a concerned citizen of Buckingham and employee of Armstrong I disagree with the bill the EPA has proposed.

If Engineering of Sciences is telling us the truth of this landfill problem and that the best solution is to cap it and monitor it through the years and most of all is less expensive than I feel that we should go with this.

So, if its not broke & its not leaking let's monitor it and cap it and leave it alone.

You yourself should know that no one can afford high taxes and if we do it the EPA way it could cause people even myself to lose their jobs.

I feel that not only does the EPA, but the Government need to stop thinking of money for a change and we all know that's what this is all about - Money!

On a political stand point that's why the world is as in bad of a shape as it is, because all you guys care about is Money and you need to stop thinking of money and start caring and more about us the people and our land.
